

PeterpointT – PT1465T, PT70T-AT, ULTRA2-PT2T14

A unique spear point design with low draft wings, lifts and places the soil from the furrow, rather than throwing it on the seeds in the next furrow. The smart design creates a protective environment around seedlings and ensures even establishment across the planting unit including wheel tracks.

Features:

- The PT1465T has enhanced suitability for use in the inverted position.
- PT70T-AT
